

In applying AI we have specialized algorithms to make known AI techniques to work in real life IE

digital tools and how that can improve daily life experience for the family as a whole (see supporting evidence [So1]).

[Ca2] letter from GLL explaining the benefits of engagement with our Research Group on exploring Personalized Behaviour Change Techniques as an alternative to their business options.

[Eco1] See letter signed by the C.E.O. of Karde company, a previous partner of our POSEIDON project, where they acknowledge:

the positive influence of our participation in the group: “

”

and the financial benefits that taking part of POSEIDON brought to their organization  
“
